Education

Texas A&M University College Station, TX
Master of Science in Computer Science *Expected May 2027*
Texas A&M University College Station, TX
Bachelor of Science in Computer Science *May 2024*

- **Relevant Coursework:** Data Mining, Artificial Intelligence, Machine Learning, Cloud Computing, Database Systems, Software Engineering, Data Structures and Algorithms, Discrete Mathematics, Object-Oriented Programming

Professional Experience

U.S Communications Direct Inc. June 2021 – August 2021
Data Specialist – IT Department *Richmond, TX*

- Leveraged PowerBI to construct visual models and reports, facilitating the identification and analysis of buyer trends and increasing company traction
- Managed routine updates to a MySQL database housing over entries for telecommunication data, ensuring data integrity and accessibility
- Developed predictive models and algorithms to better identify potential clients

Texas A&M University College Station, TX
Course Grader – Accessible Computing *January 2026 – May 2026*

- Evaluate and grade student assignments, assessments, and projects related to accessible computing and inclusive software design according to established course rubrics
- Assist students in understanding accessibility concepts such as accessible interface design, assistive technologies, and barrier-free software development by clarifying course material
- Provide detailed feedback on student work and address questions or concerns regarding coursework and grading criteria

Technical Projects

Intelligent Budge Planner August 2026 – Present

- Develop a personalized budget planning application using React, Native, and Expo, supporting personalized spending inisghts and financial goal tracking
- Design user workflows for recording transactions, reviewing spending categories, and adjusting budgets with minimal manual input
- Apply user-centered design principles to balance automated recommendations with user control, emphasizing clear explanations and simplified information displays
- Develop frontend and backend integrations to connect transaction data, budget management features, and personalized recommendations

Autonomous Driving Model | *CARLA Simulator* June 2024 – December 2024

- Developed end-to-end autonomous driving solutions tailored for underserved communities
- Constructed a Dueling Double Deep-Q Network model with reward function for lane-keeping and a Convolutional Neural Network for object detection
- Simulated autonomous driving for various dynamic environments using CARLA

Panda Express Online Point of Sale System November 2022 – January 2023

- Revamped Panda Express's POS system to optimize inventory management and accommodate customer requests efficiently
- Utilized Express.js to dynamically update customer and inventory information through a website application
- Implemented Google Translate and Google Maps APIs to enrich the application's UI and functionality, improving user engagement and accessibility

Technical Skills

Languages: Python, C++, Java, HTML, CSS, JavaScript
Technologies/Developer Tools: PostgreSQL, Agile Methodology, Jira Software, Tableau, Git Control, NodeJS, React, AWS Cloud Services, TensorFlow, PyTorch, Scikit-Learn
